To: Federal Communications Commission
Authorization and Evaluation Division
Re: B5000-B label placement

To whom it may concern,

The purpose of this letter is to clarify the placement of the security plate and FCC label on the updated L1 Identity Solutions B5000-B product (FCC ID TSP0B5000B).

The label is part of the security plate that also prevents the user from accessing the lens and camera alignment & focus screws. It is held in place with four "security"-type screws. This is the same method that was used for the previously-accepted unit (FCC ID TSP0B5000A) several years ago.

Thanks you for your attention to this matter.

Sincerely,

A handwritten signature in cursive script, reading 'Jim Queenan'.
