

1. How does the device Operate?

Answer: FM transmitter is provided by Battery DC 3.7V, Through car adapter (Input Voltage is DC 12V/24V) for charging. Frequencies are selected by set key (Please see the user manual) on the EUT. Have a frequency range : 88.2~107.9MHz are available.

2. Provide information on the device and its antenna.

Answer: The antenna is a fixed dipole antenna type. Please see the attached :  
." SHORT-TERM CONF TT2JABRACRUISER INT Photo"

3. How is it installed?

Answer: Through the bracket installed onto a suitable Location of Car's sunshine cover,  
No other installation is required

4 What test procedure was used?

Answer: ANSI C63.4-2003.

5. If tested in a car, how was it configured?

Answer: It was not tested in an automobile. It was tested in an outdoor 3 meter range as shown in the Test Set-Up photographs.

6. Was the tuning range properly verified? The test lab should indicate in the report that the tuning controls were manually adjusted to verify the maximum tuning range.

Answer: The maximum tuning range is 88.2~107.9Mhz. Test is selected with Lowest (88.2MHz), Middle(98MHz), and High(107.9MHz) channel. Please see the Test report.

7. Was the bandwidth properly tested with the maximum audio input? The test lab should describe the audio input signal (use a typical audio file from a typical device) – DO NOT use 1kHz tone from signal generator as specified under ETSI EN 301 357-1)

Answer: we played a song from Mobile Phone with the maximum audio input.

8. Does the device operate in a vehicle? Please state that this was verified.

Answer: It was not test in a vehicle.
