

Correspondence Summary

December 18, 2008

**SUBJECT: SUZHOU SATE AUTO ELECTRONIC CO., LTD. - FCC ID:
TTETP021A**

TCB question:

1. *Test report: The manual indicates that two models can be used with this repeater. However, there is no information in the report as to whether this repeater was tested with the transmitters. Please revise test report.*

Applicant's Answer:

The usermanual indication one FCC ID of the transmitter with different model number, but it is the same sensor. So, the report is show test with one sensor.

TCB question:

2. *Manual: The listing of the transmitter's model number is not sufficient. Please indicate the FCCIDs of the transmitter(s) authorized to operate with this repeater. Please revise manual.*

Applicant's Answer:

The FCCID of the transmitter is indicated to the usermanual. It's the same sensor which difference model calling.

TCB question:

3. *Test setup photos: If two transmitter models are available for use with this repeater, then please explain why there is only one set of test photos. Please revise, and indicate on photos which transmitter was tested with this repeater.*

Applicant's Answer:

It is as the above answer as the user manual.

TCB question:

4. *Applicant's cover letter/Operational Description: Please provide a response and/or a justification to the following questions:*
 - a. *Please explain whether this repeater re-radiate the input signal by demodulating, re-shaping or retiming the signal.*
 - b. *Please explain how the repeater only re-transmits uniquely identified signals from transmitters authorized to operate with it.*

Applicant's Answer:

The Justification letter is submitted for the explaining. for more information, it is stated in the section 1.3 of the test report.

TCB question:

5. *Test report: Please show that the input signal was maximum when testing the repeater.*

Applicant's Answer:

It is stated in the section 1.4 of the test report..
