

Class II Permissive Change

Company: Exalt Communications, Inc.
Address: 580 Division St.
Campbell, CA 95008

Product: EX-5i

FCC ID: TTM-105P25I
IC ID: 6254A-105P25I

Type Designation: FCC CFR 15.407
IC RSS-210

This letter is to request a Class II Permissive Change for the FCC ID listed in "Product" above.

The change under this application is (1) to add DFS software for the currently granted 5.25-5.35 GHz band and (2) to add the band 5.47-5.725 GHz operation in software including DFS functionality.

There are no hardware changes from the original application. The DFS software can not be disabled or deactivated by the end-user.

These changes may potentially affect the unintentional transmitter characteristics but do not affect the changes in the intentional transmitter. Therefore, we declare that they are permitted as a Class II Permissive Change.

I attest that the certified device will not be capable of ad-hoc mode in the 5.25-5.35 or 5.47-5.725 GHz DFS bands.

Very Truly Yours,

A handwritten signature in blue ink that reads "Lisa Moratti".
