To whom it may concern

Re: Family relationship between hearing aid models

Widex A/S hereby declares that the Widex hearing aid models

C4-CIC, C4Z-CIC

C3-CIC, C3Z-CIC

C2-CiC, C2Z-CIC

only differ from each other by different levels of hearing aid functionality.

The only difference between the C4-CIC and the C4Z-CIC is that the C4Z-CIC has an additional audiologic feature called "Zen tones" that provides a relaxing sound background.

Model C4-CIC and C4Z-CIC have the highest level of functionality while the degraded models C3xxx and C2xxx have various audiological features disabled or restricted.

The 6 above mentioned models are identical in all other aspects, hereunder same mechanic design, electronic circuit, schematics and parts lists and therefore have identical electrical/electronic characteristics including EMC, Electrical safety and Radio performance.

Sincerely

Widex A/S
