# LSP-430G USER GUIDE

Please read this manual carefully before operating your set.
Retain it for future reference.

# Highlights

Congratulations on your subscription to the LSP-430G Fixed Wireless phone. This phone has been designed to operate on the IS-2000 Air Protocol over the 800MHz band. And the phone has the advanced user interface similar to mobile phone. It has greatly enhanced voice clarity and provides various advanced features.

## Key phone features:

▶ Wide view, Graphic, Backlit Display

▶ Polyphonic Ring tones: A choice of 15 melodies and 5 bell sounds available

▶ Large Phonebook with 500 entries

▶ Speed Dialling for upto 99 numbers

▶ 3 Way call conferencing

▶ Enhanced SMS features - Group SMS.

▶ Hands free Speaker Phone

▶ Receiver Off-Hook tone

▶ Adjustable Ringer Volume, Earpiece Volume, Key Volume, Speaker Volume

▶ A Menu driven interface with prompts for easy operations

▶ Serial port for Diagnostic.

▶ Organiser: Scheduler, Alarm, Memo, Calculator, World Clock with DST, Stopwatch

▶ Fast charging battery

▶ Voice and Data Service (Internet Access)

# 1. Important Information

## 1.1  Safety Instruction

WARNING / CAUTION

To reduce the risk of fire or electric shock, do not expose this phone to rain or moisture. Do not use this phone in swimming pools or other water bodies.

## 1.2  Optimal Phone Performance

▶ Do not hold the antenna when operating the phone, or operate the phone when someone is within four inches (ten centimeters) of the antenna. Both cases affect the call quality and may cause the phone to operate at a higher power level than required.

▶ For the best call quality, keep the antenna free from obstructions and position the antenna upright.

▶ Do not use the phone if the antenna is damaged. Replace the damaged antenna immediately by a qualified technician. Use only a manufacturer-approved antenna. Non-approved antennas, modifications or attachments may impair call quality and damage the phone.

▶ RF energy may affect improperly installed or inadequately shielded personal medical devices such as pace-makers or hospital monitors. Consult the manufacturer of any personal medical devices to determine whether they are adequately shielded from external RF energy. Turn your phone OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.

▶ If this phone causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna

- Place the radio or television farther away from the phone.

- Connect the equipment to an outlet on a circuit different from that to which the phone is presently connected.

4

**Regulatory Statements to be included in the Users Guide for Sputnik**

# USA-Federal Communications Commission (FCC)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna
-Increase the distance between the equipment and the receiver.
-Connect the equipment to outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## Caution: Exposure to Radio Frequency Radiation.
To comply with FCC RF exposure compliance requirements, for mobile configurations, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.

# 1. Important Information

- Consult the Authorized LG-Nortel Dealer for assistance of an experienced radio/TV technician.

▶ Use battery, antenna and AC/DC power adapter provided by LG-Nortel . Using parts made by any other manufacturer may invalidate the warranty.

▶ Only authorized personnel should service the phone and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.

▶ Do not use the phone in any designated "cellular phone use" area.

▶ Avoid using the phone in high temperature or humidity.

▶ Avoid spilling any liquid on the phone. If the phone gets wet, turn the power off immediately. If the phone doesn't work, please contact the service provider immediately.

▶ Avoid shock or impact.

▶ We recommend you to charge the backup battery before initial use. The backup battery may be discharged during delivery.

## 1.3  Care and Service

Before cleaning, always unplug the phone from the wall outlet and remove the antenna (or disconnect the antenna cable). Do not use liquid or aerosol cleaners; use a damp cloth for cleaning.

If the phone doesn't work, do not attempt to disassemble it; contact the phone service agent for assistance.

If any of the following conditions exist, unplug the phone from the wall plug, remove the battery and call the qualified engineer.

- The power supply cord is damaged or frayed.

- Liquid has spilled into the phone.

- The phone has been exposed to rain or water.

- The phone has been dropped or damaged.

- The phone does not function normally even after following the operating instructions.

Important Information

# 1. Important Information

## 1.4  Safety Information

### WARNING

▶ For safety, use only an adapter approved by LG-Nortel .

LG-Nortel  does not bear responsibility for any faults that may arise due to non-conformation to this guide. Example: LSP-430G

(LG-Nortel  Power Adapter Source:   DC 5V / 1A)

▶ Do not, in any way, cause a short-circuit. It may start a  fire or the phone may explode causing injury.

▶ Do not create a sudden impact on the battery by throwing it. Do not dispose off batteries by putting them in a fire. They may explode or catch fire due to the electrolyte  within.

### CAUTION

▶ Do not use the phone with a car battery.  It may cause  electric shock, fire, breakdown or transformation.

▶ Avoid using the phone in high temperature or humidity. Avoid spilling any liquid on this phone. If the phone gets wet, Switch off phone and turn off AC power supply.

▶ Keep the phone dry. Submersion, humidity, and liquids contain minerals that may corrode internal electronic circuits.

▶ Do not store or use the phone in dusty or dirty areas as  this can damage the moving parts.

▶ Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

6

# 1. Important Information

▶ Do not store the phone in cold areas. When the phone warms upto its normal operating temperature, moisture can form inside the phone, which can damage the internal electronic circuit boards.

▶ Do not attempt to open it. Non-expert handling of the device could damage it. It may cause fire, electric shock and breakdown. Consult your authorized LG-Nortel dealer for assistance.

▶ Do not drop, knock or shake the phone. Rough handling may break the internal circuit boards.

▶ Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth that has been slightly dampened in a mild soap and water solution.

▶ Do not paint the phone. Paint can clog the device's moving parts and prevent proper functioning.

▶ During lightning, do not touch the power plug or the phone line. It may result in an electric shock or death.

▶ Do not install the phone under direct sunlight or on an uneven surface.

▶ Before using the plug, check the available power voltage. Inaccurate power voltage may cause fire and damage.

Example: LSP-430G Input Voltage: 100 ~ 240V.

7

# 1. Important Information

▶ Do not plug many power cords into one outlet.
It may cause fire or electric shock.

▶ Do not remodel the power cord or disassemble it.
If the power cord or plug is impaired, do not use it.
It may cause fire or electric shock

▶ Do not install the phone in an ill-ventilated place.
It may cause fire or a breakdown.

▶ Do not touch the plug with wet hands. When disconnecting the power cord of any accessory, grasp and pull out the plug itself and not the cord. It may cause fire or electric shock.

▶ Do not put heavy objects on the power cord. Do not bend the power cord too much. It may cause fire or electric shock.

▶ Use only an LG-Nortel approved battery and adapter. If not, it may cause an explosion or result in a short-circuit. LG-Nortel does not bear any responsibility for the damage.

▶ When you disconnect the power cord of any accessory, grasp and pull the plug itself and not the cord. It may cause the adapter to breakdown.

| ✉ | Text message: Displayed when a text message is received |
| 📧 | Voice message: Displayed when voice message are received |
| 📧 | Text and Voice message: Displayed when text and voice messages are received. |
| 🔒 | Lock mode |
| 🔋 | Battery charge level: Indicates charged battery level |
| AC | Charge complete (Others : ⬚ , Only outlet (No battery) ) |
| ▭ | No AC power & Battery ON. But in low battery state |

# 2. Introduction

## 2.3  Installation

You should follow each step carefully as shown below in order to guarantee the proper operation of
CDMA Fixed Wireless Phone.

Main Phone

Dipole Antenna

AC/DC Power Adapter

User Guide

11

# 2. Introduction

## STEP I. Check Components

▶ The following components are supplied for Fixed Wireless Phone.

1. LSP-430G Main Phone with Handset   -1 EA-

2. Dipole Antenna   -1 EA-

3. AC/DC Power Adapter   -1 EA-

4. User Guide   -1 EA-

▶ Please make sure that these components are present before you begin to install the phone. If any of the components are missing or damaged, contact your service provider immediately.

## STEP II. Place the Terminal

▶ Place the phone on the stable flat surface area (desk, table, etc.). Serious damage may result if the phone is dropped. Do not place the phone within 1 meter of heaters or radiators.

This phone is designed for desktop usage. Avoid the direct exposure to sunlight and dampness.
▶ Read the SAFETY INFORMATION located in the first part of this document before you place the phone.

## STEP III. Connect Components (Please refer to "Installation Steps" in 2.4)

▶ Connect the antenna to the TNC antenna connector located at the top of the phone. If you have placed the phone on a flat surface, position the antenna upright.

▶ Connect the curl cord of the handset to the RJ-11 port located on the bottom side of the phone.

▶ Connect the AC/DC Adapter cable to the DC input port located at the top of the phone.

- If it is correct, a beep tone will be heard.

- If it is not correct (Booting fails or beep tone is not heard), you will have to reconnect the adapter.

# 2. Introduction

▶ Please observe the following to get better voice quality.

1. Keep away from electrical appliances such as TV, computer, radio etc.

2. Keep the phone in a high and central location without any obstructions.

3. Raise the integral antenna of the phone to get maximum strength as shown in the figure.

## STEP IV.  Check the LCD Display

▶ After you follow the installation instruction step I to step III, please check  the LCD for normal operation.

▶ If you do not see the status of service, please repeat the 4th instruction of step III.

Then confirm the status of phone to get the proper signal strength from the service operator system.

Introduction

13

# 2. Introduction

## 2.4  Installation Steps
Please follow the procedure below to install the phone properly.

Connect base-handset to the handset connector.

Connect the antenna to the TNC connector (Turn right).

Connect the AC power supply.

Press END button to operate initially.

# 3. Basic Operations

## 3.1  Making a Call

You can make a call as follows.

1. Pick up the handset or press 🔊 button.

2. Listen for dial tone.

3. Enter the phone number with area code if needed.

4. Wait for the Auto Dial Time-out or Press `Dial/Flash` button.

5. The call is connected and you may start conversation.

6. To disconnect the call, replace the handset or press 🔊 button.

※ When the user presses the `Dial/Flash` button after dialing any desired number, the phone makes a call immediately.

## 3.2  Redialing Last Number

You can make a redial to last number, shown in All Calls.

1. Pick up the handset or press 🔊 button.

2. Listen for dial tone.

3. Press `Dial/Flash` button.

4. The call is connected and you may start conversation.

5. To disconnect the call, replace the handset or press 🔊 button.

※ You can also dial any of the last 60 (Dialled+Received+Missed+In Call Memo) numbers stored in All Calls.

## 3.3  3 way call conferencing

You can start tripartite conversation.

1. Enter the phone number of the 2nd party phone while you are in telephonic conversation with 1st party.

2. Press `Dial/Flash` button.

This service should be provided by your service provider.

Basic Operations

15

increase

# 3. Basic Operations

Basic Operations

## 3.4  Volume Control

1. Press  **Up/Down**  button of navigation while in a call, to adjust Earpiece volume.

## 3.5  Receiving a Call

When the bell rings or backlight blinks in Light mode, you can receive a call  as follows

1. Pick up the handset or press the  🔊  button.

2. Start a conversation.

3. To disconnect the call, replace the handset or press the  🔊  button.

## 3.6  Lock Mode

Protects your phone from unauthorized use. Once the phone is locked, it is in restricted mode, until the lock code is entered. This will allow you to receive phone calls and still make only emergency calls. The lock code/password on your phone is "0000" by default. If you need to modify the lock code, you may modify it

using the new lock code within the  security set Menu.

* Also, you can lock your phone manually and change your default password as explained [4.6.4 page no.40]

**Under Lock Mode**

1. Press '0' button for some time.

The phone is now locked.

2. To unlock, press Unlock button(Soft Key 2).

| •••••• | Dial/Flash | | •••••• |
|---|---|---|---|

Soft Key 1                              Soft Key 2

3. Enter unlock code. (Default "0000")

## 3.7 Entering and Editing Information

You can edit the phonebook, Short Messages, Scheduler and Banner using various text input mode.

# 3. Basic Operations

## Key Functions

Soft key 2 : Press to scroll and select a mode through menus.

- You can scroll through the modes using Soft key 2 in the following

- ⊛ Shift key : Used to change the letter case.  In Abc Mode, it switches 3-types of letter case such as Abc, ABC, abc.

- ⊙ . key : In Abc mode, press to insert sentence mark ( . , - ? ! ' @ : 1 )

- ⊙ SPACE key : Press to complete a word or insert a space.

- Clear key : Press to delete a single space or character. Press and hold to delete entire words.

## Input Mode

Text Input provides six modes for entering text, numbers, special characters, and punctuation.

- Abc Mode : Use Abc mode to input text in English. If you want an instant input of numbers in Abc mode without converting to 123 mode, press the button until number is displayed In Abc mode.

- 123  Mode : Type numbers using one keystroke per number. To change to 123 mode in a text entry field, press Soft key 2 until 123 mode is displayed.

- Symbols Mode : Insert special characters, punctuation. You may use any of the special characters. When the special characters are displayed, you can select the number corresponding to the character that you want to input. To search more symbols, press Soft key 1 Next or Up/Down key button.

- Smileys Mode : Insert smileys in your text. When the smileys are displayed, you can select the number corresponding to the smileys that you want to input. To search more smileys, press Soft key 1 Next or Up/Down key button.

17

# 3. Basic Operations

- Templates : You can use predefined message in the phone memory immediately. This mode is very useful for save your time.

Initial Cap(Abc)

Only the first letter is capitalized.

Caps Lock(ABC)

All subsequent letters are capitalized.

Lowercase(abc)

All subsequent letters are lowercase.

**Examples Using ABC Text input**

*Typing In ABC(Multi-tap) Mode*

For example, to type "MANUAL", follow these steps:

1. Press: Soft key 2 to change letter case Abc mode.

2. Press: Shift key to change to ABC Caps Lock mode.

3. Press:

4. Display: MANUAL

## 4.1 Names

You may select from four Sub-Menus (Find, Add, Speed Dial, Erase All Names) for this item. If you press Soft Key1, Menu is activated.

| •••••• | Dial/Flash | | •••••• |
|---|---|---|---|
| Soft Key 1 | | | Soft Key 2 |

To scroll in Menu, press ▲, ▼, ◄ or ► button.

To return to the initial screen, press `END` button and to return to the previous screen, press `Clear` button.

* In this menu, All sorts of the icon have the meaning as follows:

- Name of person :      ☺
- Mobile phone number :      📱
- Home phone number :      🏠
- Office phone number :      🏢
- General phone number :      ☎
- E-mail address :      📧

- Memo:      📝
- Ring:      🔔

### 4.1.1 Find

To find phone numbers you have stored in the Phone Book.

1. Press Soft key 1 `Menu` + `1` ( `Names` ) + `1` ( `Find` ) in on-hook state.

2. Select a desired search Menu. `Name Search`, `Number Search` : Enter full or starting of name (Number), select `OK` .

3. Select desired item.

4. To make a call, pick up the handset or press 🔊 button.

5. To view, press Soft Key 1.

   `Options` : You can `Edit` or `Erase`.

   You can send a message also while number is highlighted.

# 4. Menu Tree

## 4.1.2 Add

You can save upto 500 entries in your LSP-430G phonebook.

You can store multiple contact details under a Name: Mobile Number, Home Number, Office Number, General Number, E-mail address of the contact.

You can also add any additional details about the contact like the Person's birthday , favorite things etc in Memo.

Lastly, there is an option to assign a Ring tone to a Name.

1. Press Soft key 1 **Menu** + **1** ( **Names** )
**2** ( **Add** ) in on-hook state.

2. Enter the information to select a desired item.

## 4.1.3 Speed Dial

Speed Dial allows you to make a call faster by just pressing a corresponding number.

You can save upto 99 entries.

1. Press Soft key 1 **Menu** + **1** ( **Names** ) +
**3** ( **Speed Dial** ) + **Options** + **1** ( **Add** )
in on-hook state.

2. Find your desired phone number.

3. Select **OK** .

* You can **Replace or Erase** a stored item.

## 4.1.4 Erase All Names

You can delete all Entries in your LSP-430G phone book.

1. Press Soft key 1 **Menu** + **1** ( **Names** ) +
**4** ( **Erase All Names** ) in on-hook state.

2. Enter Lock Code. ( Default 0000)

3. Press "Yes" or "No".

24

# 4. Menu Tree

## 4.2 Messages

Text messaging, page and voice mailbox become available as soon as the power is on. You may access the above type of messages using the Messages ( ✉ ) key.

The phone can store upto 50 messages in each Inbox and Outbox. And the phone can also store upto 50 messages in Archive, 30 messages in Drafts, 30 messages in Templates, 5 SMS Groups with 10 Entries per Group.

If you press Soft Key1, Menu is activated.

| •••••• | Dial/Flash | | •••••• |
|---|---|---|---|

Soft Key 1                          Soft Key 2

To scroll in Menu, press ▲, ▼, ◀ or ▶ button.

To return to the initial screen, press **END** button and to return to the previous screen, press **Clear** button.

To access messages, Press Soft key 1 **Menu** + **2**( **Messages** ) in on-hook state.

* In the list of Inbox or Outbox , all sorts of the icon have the meaning as follows:

- Unread :              ✉
- Unread Urgent :       ✉
- Read :                ✉
- Read Urgent :         ✉
- Sent :                ▦
- Sent Urgent :         ▦
- Unsent :              ▦
- Unsent Urgent :       ▦

### 4.2.1 Write

1. Press Soft key 1 **Menu** + **2**( **Messages** ) + **1**( **Write** ) in on-hook state.

2. Write message.

   Refer to the 3.8 (page 17) Entering and Editing Information about text input.

3. Select **OK** .

25

# 4. Menu Tree

4. Enter phone number or press `Options` .

`Options` : can select `Find` , `SMS Groups` .

5. Select options as following.

*Priority*: Allows you to give priority to Message as `Normal` or `Urgent` .

*Delivery Ack*: This function allows you to know whether the Messages have been successfully transmitted to the recipient. If you want to activatethis function, set to `On` or `Off` .

*Deferred Delivery* : This function allows you to reserve when the message is sent.

You may select from seven options( `Immediate` /

`After 30 Minutes` / `After 1 Hour` /

`After 2 Hours` / `After 12 Hours` /

`After 1 Day` / `After 2 Days` )

*Validity Period* : This function allows you to define the period of the valid message until the message sending is completed.

You may select from seven options( `Default` /

`30 Minutes` / `1 Hour` / `2 Hours` /

`12 Hours` / `1 Day` / `2 Days` )

*Save Sent Message:* This function allows you to choose whether the sent message shall be saved or not. You may select `On` or `Off`

6. Select `Send` .

## 4.2.2 Inbox

Received messages are stored here.

1. Press Soft key 1 `Menu` + **2** ( `Messages` ) + **2** ( `Inbox` ) in on-hook state.

2. To erase message, select `Erase` .

3. To view desired message, select `View` .

4. You may select from five options (1. Erase 2. Reply  3. Forward  4. Move To Archive 5. Save Number).

* For example, the meaning of (2/3) in Inbox is that 2 out of 3 messages are unread.

# 4. Menu Tree

## 4.2.3 Outbox

All your successfully sent messages are saved here.

1. Press Soft key 1 `Menu` + **2** ( `Messages` ) +
**3** ( `Outbox` ) in on-hook state.

2. To erase message, select `Erase` .

3. To view desired message, select `View` .

4. You may select from four options (1. Erase 2. Resend 3. Forward 4. Move To Archive).

## 4.2.4 Voice Mail

Voice mail notifications indicate the number of new voice mail messages in your mailbox.

Only the most recent voice mail notification will be stored in your phone;

previous message will be overwritten.

1. Press Soft key 1 `Menu` + **2** ( `Messages` ) +
**4** ( `Voice Mail` ) in on-hook state.

2. Pick up the handset or press 🔊 button to make a call back your voice mailbox if the number of the voice mailbox is provided by the telecom service company's system.

## 4.2.5 Broadcast box

Message box for advertisement

1. Press Soft key 1 `Menu` + **2** ( `Messages` ) +
**5** ( `Broadcast box` ) in on-hook state.

2. To erase all messages, Select `Erase` .

3. To view desired message, Select `View` .

4. You may select option.

## 4.2.6 Archive

Archive allows you to store your messages in a different folder.

1. Press Soft key 1 `Menu` + **2** ( `Messages` ) +
**6** ( `Archive` ) in on-hook state.

# 4. Menu Tree

2. To erase message, select  **Erase** .

3. To view desired message, select  **View** .

4. You may select options
(**Inbox:** 1. Erase 2. Reply 3. Forward
4. Save Number  **Outbox:** 1. Erase 2. Resend
3. Forward)

## 4.2.7 Drafts

A Draft is a function enabling you to store messages
to be sent in Future. A total of upto 30 messages may
be saved in Draft. These include failed messages,
incomplete/unsent messages saved by the user and
also messages which automatically get saved when a
user is interrupted by a call while composing a
message.
