How To Connect?
Q: What should I do if the keyboard and mouse combo stopped working or cannot be connected after a period of usage?
A: Don't worry, follow the steps below to complete the connection.
Step 1:
Unplug the USB Nano and then plug it into the USB port again. Reinstall the battery for Keyboard and mouse.
Step 2:
Place the keyboard as closely as possible to the USB receiver, then press and hold the "Esc" and "+/=" key together for 3-5 seconds. Place the mouse within 30CM to Nano receiver, Press the left, center and right keys at the same time.
Step 3:
Wait until the power light turns on, the LED will flash. And the keyboard and mouse will be ready.
Note: If it still won't work follow the steps above, please contact us in time.

Step 3:

Wait until the power light turns on, the LED will flash. And the keyboard and mouse will be ready.
