Applicant: Mikrotiks SIA
Pernavas 46 Str.
Riga, Latvia LV-1009

FCC ID: TV7METL5SHPN
FCC Rules: NII Transmission System approval and Part 15.407 U-NII

Gentlemen

The form 731 and application have been electronically submitted and any attachments will be up loaded to your site to be used in processing Class 2 Permissible Change to this certified equipment.

Change from the original design was provided through firmware (software) change and this equipment was not certified as SDR equipment. The electronics remain identical to original design.

The design was authorized under 47 CFR 15.247 on 5/25/2012 for operation in the 5740-5830 MHz band. Compliance to meet the new 15.407 regulations required power reduction in the 5745-5825 MHz band. The change application also addresses the addition of U-NII-1 frequency operation in the 5180-5240 MHz frequency band. While not explicitly addressed in the report, the requirement of KDB926956 Q&A #7 c);, compliance with the new regulations are demonstrated including: software security, Band-edge measurements, Band Power, high and low channel emissions, Power Spectral Density and power reduction when used with high gain antennas. There is no change to the antennas as previously authorized.

Please review the application and process it as Class 2 Permissible Change under original FCC Identifier FCC ID: TV7METL5SHPN.

Permanent Confidential Exhibits

Mikrotikls SIA requests that the material in the **Schematics, Block Diagram, and Operational Descriptions** be withheld from public disclosure pursuant to Sections 0.457 and 0.459 of the Commission's Rules following grant of the application.
