RE: Test Report Revision 2

Men:

A type error was discovered in test report and has been corrected. The type error was a heading in a table displaying transmitter functional parameters. Page 4 of the report identifies report revisions and locations. The table located on top of page 22 second column was corrected by replacing reference of Milliwatts with dBm. No data has been altered only heading in table. The revised report has been up loaded to your site for use in correcting the report filed with the application.

Should you require any further information, please contact the undersigned.
Thank you for your consideration in this matter.

Sincerely,

Scot Rogers
