September 13, 2006

RE: Shenzhen Aee Technology Co., Ltd.

FCC ID: TW4LR255

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The block diagram should show the frequencies of all oscillators in the TX portion of the device (CFR 2.1033(a)(5)). Please update.
- 2) The RF transmitter module appears to show a subshield over a portion of the circuits. FCC expects photographs to also show what is under the subshield portions. Please update.
- 3) This device appears to be labeled with a DoC logo as well. Please note that that use of the DoC logo should be justified. Although this device may contain a RX, the RX portion defaults to Verification since the TX portion is Certified (see 15.101(b)). Additionally it does not appear that this attached to a PC. Please justify or correct as necessary.
- 4) Schematics of the TX circuitry portion of the device have not been provided. Please provide.

Timothy R. Johnson  
Examining Engineer
