Sunnyvale, CA. 94085

Dear Mark,

In regard to the final TCB comment, here is the requested statement.

“In worldwide mode the device does passive scanning on channels 12, 13, and 14. If a master device is detected on these channels, then and only then will we actively try to connect to it.”

Let me know if anything else requires clarification.

Sincerely,

A handwritten signature in black ink that reads "Ronald Seide". The signature is written in a cursive style and is positioned above the printed name and title.

Ronald Seide  
President
