RE: MSD30AG Operation

We, Summit Data Communications, Inc., attest that this device, the SDC-MSD30AG, is fully compliant with all applicable FCC rules. In particular, the SDC-MSD30AG does not support ad-hoc/peer-to-peer operation in the DFS bands (5250-5350 and 5470-5725 MHz); when operating in these bands, the SDC-MSD30AG will always do so in the presence of a DFS master device. When operating in these bands, the device only performs passive scanning (i.e., scanning without transmitting).

In addition, the SDC-MSD30AG does not allow for operation in the 5600-5650 MHz bands.

Sincerely,

Ronald Seide
President
Summit Data Communications, Inc.
