

## The letter of technique declaration

The ECS notebook platform models: T10IL1 / T21IL1 / TXIYZ(X=10, 20, 21 / Y=IL,II) include a FCC approved 802.11 b/g modular. The given module report of 802.11bg mini-card (FCC ID: TX2-RT8191SE) indicates that the contents of original antenna listed as follows: the Model Number: DQ661500301, Antenna Type: PIFI, max antenna gain: 3.95dBi. The newer contents of antenna will be modified as follows: Model Number: JEM T20&T21-WLAN, Antenna Type: PIFI, Max Antenna gain: 3.80dBi, and the deviation of conducted power between the original module report and latest one is less than +/- 0.5dB. For further question, please refer to SAR TEST REPORT. From technical perspective, it can be determined that it is not necessary to implement EMC (Part15.247) test again.

Regards,

Vincent Su / RF Manager
