Date: December 18, 2023

Request for Modular Approval for FCC ID: TX2-RTL8735BDM

Item	Requirements	EUT
1.	The radio elements must have the radio	The module is equipped with its own shielding
	frequency circuitry shielded. Physical	case.
	components and tuning capacitor(s) may be	
	located external to the shield, but must be	
	on the module assembly	
2.	The module must have buffered	The module has buffer modulation / data inputs.
	modulation/data inputs to ensure that the	
	device will comply with Part 15	
	requirements with any type of input signal	
3.	The module must contain power supply	The module has its own power supply regulation.
	regulation on the module	
4.	The module must contain a permanently	The module has an external antenna with
	attached antenna, or contain a unique	connector. The antenna gain for 2.4GHz is 3.5dBi;
	antenna connector, and be marketed and	for 5GHz is 5.0 dBi.
	operated only with specific antenna(s), per	
	§§ 15.203, 15.204(b), 15.204(c), 15.212(a),	
	2.929(b)	
5.	The module must demonstrate compliance	The module was tested on evaluation board, and
	in a stand-alone configuration	it's not inside of another device during testing
6.	The module must be labeled with its	The module transmitter will be labeled with its own
	permanently affixed FCC ID label, or use an	FCC ID, and for OEM integration the integration
	electronic display	manual contains labeling instructions for the host
		device per Part 15.212 (vi)
7.	The module must comply with all specific	The module approved transmitter complies with all
	rules applicable to the transmitter, including	applicable rules and the integration manual
	all the conditions provided in the	contains any specific requirements addressed to
	integration instructions by the grantee	the integrator and/or to the end-user of the final
		end-product.
8.	The module must comply with RF exposure	The module complies with the FCC RF exposure
	requirements	requirements for fixed and mobile applications. RF
		exposure is addressed in the RF exposure exhibit.
