Columbia, MD 21046

Date: 2017-12-07

SUBJECT: FCC Class II Permissive change for FCC ID: **TX2-RTL8821AU**

To Whom It May Concern:

We, **Realtek Semiconductor Corp.**, would like to request a Class II Permissive Change for the FCC ID: TX2-RTL8821AU is to **add a host: High Fidelity Audio Player** (Model: **PD-S10/** Brand: **Onkyo**) to the certified module which was originally granted on 03/06/2014, and complies with FCC New Rule requirements per a C2PC dated on 02/17/2016 under FCC ID:

TX2-RTL8821AU.

Since the RF function remain the same with the original application (no change of module and antenna). It is acceptable for C2PC change application.

The module mentioned above has been approved and is electronically and mechanically identical to the original instruction and requirements. Therefore, we, **Realtek Semiconductor Corp.**, take the responsibility to ensure each module complied with all requirements after integration in the host.

Also, please note that SAR testing is performed to demonstrate compliances since the certified module has been installed to the host with the distance less than 20cm while using.

If you have any questions regarding this application, please feel free to contact me.

Sincerely,

Dana Liaw / Project Manager
Realtek Semiconductor Corp.
