

Operational Description

EUT is the hub function device to connect wired USB device with wireless USB host controller. If the upstream port is connected to host PC with USB cable, DWA worked as wired USB Hub device

The DWA uses RTU7010 to deal with UWB signal .The RTU7010 is a highly integrated, high-performance WiMedia-compliant physical layer (PHY) solution. It implements a complete WiMedia suite of data rates (53Mbps to 480Mbps), and high-performance radio frequency (RF) and baseband (BB) components in a single-chip CMOS design.

The other instruction, please have a look at the users manual.
