Subject: FCC Change in FCC ID and ISED Multiple Listing for FCC ID: TXJCM60V25D,
IC: 7332A-CM60V25D, Model #: CM60-V25D

To Whom It May Concern:

This request is for a Change in FCC ID and ISED Multiple Listing against the already FCC ID: TXJCM60V25 and IC: 7332A-CM60V25

We wish to have a new FCC ID, ISED Certification Number and Model number due to the following:

The CM60-V25D is lower power version of GMEs CM60-V25B which only consumes 150mA of current on standby. In order to differentiate the CM60-V25D from the other CM60 versions we would like to have a separate FCC ID. The only testing that would affect would be the unintentional emissions and that the testing has been completed

Sincerely,

A handwritten signature in black ink, appearing to read 'Filip Zalio', with a long horizontal stroke extending to the right.

Filip Zalio,
Engineering General Manager
