Overall Assessment Letter for the Standard Communications Pty, Class D DSC VHF Radio.

FCC id: TXJGX600D

I have reviewed this application and find it compliant.

This is an application for a class 2 permissive change to the GX600D. The change includes:

- Addition of a remote control head RM600D

Please note the following:

1: Product differences.

I am satisfied with the Client's declaration that the GX600D VHF Transceiver remains fully compliant upon interconnection of the RM600D remote control head.

3: Exhibits.

An additional limited test report has been provided which demonstrates continued compliance with Part 80 for the GX600D with RM600D remote control Head. Only those exhibits with additional information have been uploaded.

I underwent the FCC RF exposure evaluation training at BABT in May 2006 and July 2007.

Yours sincerely

Allen Ferry
Compliance Manager
