Re: Class II Permissive Change

This application is for a class II permissive change to the TXL34066 grant.

We would like to modify the existing TXL34066 grant to add limited modular approval per FCC guidance " 178919 D01 Permissive Change Policy v05r03" sections 6) a) and 6) c), there have been no changes to the electronics and the original testing is still valid.

Sincerely,  
Brian Hodges
