Modular Approval Request

FCC ID: TXTGCY300-42

To Whom It May Concern,

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No*
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	YES, shielding case visible from the outside	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	YES, there is a μ CU and related circuit play as a buffer to comply with the requirements	
(c) The module must contain power supply regulation on the module	YES, there is a LDO voltage regulator on the module	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be	YES, product with PCB antenna	

marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)		
(e) The module must demonstrate compliance in a stand-alone configuration	YES, for certification a sample of the module is operating stand-alone via PC configuration	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	YES, the FCC ID -is laser printed at shielding -visible on the outside of the module	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	YES, such compliance information will be in the integration manual	
(h) The module must comply with RF exposure requirements	YES, tested/assessed based on these requirements.
