

JENNIC
1023 V3.0

The main circuit board features a large black square chip in the center, a smaller square chip at the top, and numerous other components labeled with alphanumeric codes. The labels include C1 through C18, R1 through R9, U1, U2, J1 through J20, and J4. The board is populated with various surface-mount components, including capacitors, resistors, and integrated circuits. A blue component is also visible on the left side. The board has a green solder mask and gold-plated edge connectors.
