Paris, October 10, 2006

Dear Madam, dear Sir,

COMPOSITE SYSTEM

Our system use both WIFI and RFID (2GHz and 13MHz).

We want to register as a composite system.

Unfortunately when we registered the first part (FCC ID **TYR-TAGTAG**) (WIFI – 2GHz) we forgot to select composite system and now we are unable to register the second part (RFID, 13MHz) as a part of the first.

This is the reason why we register the second part under the FCC ID **TYR-TAGTAG-RFID**.

We would like the 2 systems TYR-TAGTAG and TYR-TAGTAG-RFID to be ONE composite system under the same FCC ID **TYR-TAGTAG.**

We are very sorry for this mistake and hope you will be able to correct it.

Olivier Mével
CEO

Ps : for the TYR-TAGTAG : the form 731 confirmation number is EA400336
