

### TCB Q&A

**Question 1.** The SAR report indicates there are two versions of Bluetooth module that can be installed in the phone. Which version of hardware is this application for?

[Note, the configuration with the other Bluetooth module will need a different FCC ID]

**Answer:** *We have tested both of the BT chips for the shortage of BT chipset. This application is for BC04 - UGNZ9-F03A BT Specification v2.0+EDR. The grantee understands the need for separate FCC IDs for the two different versions of hardware.*
