Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'ET16 USB V04', positioned on a black surface with a white millimeter ruler. The component features a USB connector on one side and four gold-plated pins on the other. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm.
Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component, labeled '1321', positioned on a black surface with a white millimeter ruler. The component has a rectangular shape with two circular mounting holes and three small white markings. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm.

Solder Board-Component View 6	 A photograph of a small green printed circuit board (PCB) component, labeled 'T-003', mounted on a blue textured surface. The component features two black rectangular components, likely capacitors or inductors, and several gold-colored solder points. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.
Solder Board-Component View 7	 A photograph of a small green printed circuit board (PCB) component, labeled 'T-003', mounted on a blue textured surface. The component features a gold-colored connector at the bottom and several gold-colored solder points. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.

Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) component, labeled 'ET16_KEY_V06', positioned on a blue textured surface. The component is rectangular with several connectors and components. It is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component spanning approximately 100 mm in length and 50 mm in width.
Solder Board-Component View 9	 A photograph of a small green PCB component, labeled '1321', positioned on a blue textured surface. The component is small and rectangular. It is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component spanning approximately 20 mm in length and 10 mm in width.

Solder Board-Component View 10	 A photograph of a small green printed circuit board (PCB) component, labeled '10', positioned on a black surface with a white millimeter ruler. The component is irregularly shaped with a central circular cutout and several mounting points. It is placed against a blue textured background. The ruler shows measurements in millimeters, with the component's width spanning approximately 10 to 20 mm and its height around 10 to 15 mm.
Solder Board-Component View 11	 A photograph of a small green printed circuit board (PCB) component, labeled '11', positioned on a black surface with a white millimeter ruler. The component is irregularly shaped with a central circular cutout and several mounting points. It is placed against a blue textured background. The ruler shows measurements in millimeters, with the component's width spanning approximately 10 to 20 mm and its height around 10 to 15 mm.
