Re: FCC ID: U2M-AP102

Applicant: Senao Networks, Inc.
Correspondence Reference Number: 46085
Form 731 Confirmation Number: EA522425
Date of Original E-mail: 07/10/2014

The permissive change description of the above referenced application states that it is adding DFS bands and there is a DFS test report. However, this application was filed as a DTS and no line items correspond to DFS bands.

Please clarify and/or correct the 731 form in order to continue processing.

Dear Edna,

Sorry for the confusion. This application original was certified only for 2.4 and 5.725-5.85G under older DTS rule only. Now due to new DTS/NII rule change, the applicant want to correct original 5.725G DTS certification to comply with new 5.725-5850G band under new NII rule, also applicant want s to add DFS bands to this ID. However, due to original application is not filed as a composite device and does not have NII equipment class, so we are not able to file it under NII equipment class and this is the reason why we still filing it under the original DTS equipment class. Please set this ID in audit mode so that we can ask original TCB to change the application to composite filing and add new NII equipment class for our filing. Thank you and we appreciate your help.
