

Description of Permissive Change

The application is prepared for FCC class II permissive change for converting the DTS filing from 15.247 to 15.407 under new rule. Also, we are adding DFS bands through software enabling to its original parent application under old rule.

Both devices, original and updated versions, are electrically identical in all aspects except enabling frequency bands of 5260 ~ 5320 MHz and 5500 ~ 5700 MHz.
