Subject: Modular approval request

FCC ID: U2M-PCE4553AH

Date: March 28, 2014

Dear reviewer:

The modular would like to have authorization as a modular approval.

The requirements of section 15.212 have been met and shown on the following statements

- 1) The radio elements of the modular transmitter must have their own shielding
The modular has shielding. Please refer to external photo.
- 2) The modular transmitter must have buffered modulation/data inputs
The buffer is integrated with QCA9880
- 3) The modular transmitter must have its own power supply regulation
The part No. of regulator is QCA9880 / RT8010
- 4) The modular transmitter must comply with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204 (c).
Antenna connector is UFL and no external amplifier is used for this module.
The modular complies with above requirement.
- 5) The modular transmitter must be tested in a stand-alone configuration
The modular is tested in a stand-alone configuration via an extender. Please refer to test setup photo.
- 6) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.
The modular complies with the requirement. Please refer to label location and label sample exhibit.
- 7) The modular transmitter must comply with any specific rules or operating requirements
The modular complies with the requirement. Detail information please refer to user manual
- 8) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.
The modular complies with the requirement for mobile and fixed installation. Please refer to RF exposure exhibit

Please contact me if you have any questions about this letter.

Best regards
