1135 Atlantic Avenue, Alameda, California 94501-1176 • Telephone (510) 864-9300 • Fax (510) 864-6860

Attention: Application Examiner

RE: Request for Confidentiality

Applicant: S&C Electric Company

FCC ID: U3DPHASENETT and U3DPHASENETR

To whom it may concern:

Request is hereby submitted by S&C Electric Company to withhold permanently from public review certain portions of the application for equipment certification for the referenced FCC identifiers.

This request for confidentiality is made pursuant to 47 CFR 0.457(d) and 0.459 of the FCC Rules.

In particular, the following sections of the application are to be kept permanently confidential:

- Schematics
- Detailed Block Diagrams
- Detailed Operational/Functional Description
- Tune up procedure
- Parts list
- Internal photos (this product is a new technology, new product niche)
- User manual (This product is only sold to select electric power utilities to operate power grid equipment and be used in substation environments. Making any controls or operations knowledge public could compromise the operation or security of utilities equipment and safety measures.)

S&C Electric Company has invested considerable time and materials in research and development, at both a radio level and at a systems level, to produce this product. Disclosure of this product would give competitors an advantage in developing similar products, and would disclose successful implementation of unpublished, leading edge technology and security controls that we have developed.

If you have further questions or have need of further information, please contact the undersigned.

Sincerely,

Dave Munoz
S&C Electric Company
