## USB to SATA Bridge Adapter User's Manual

### INTRODUCTION

The USB to SATA Bridge Adapter turns any SATA drive into a convenient external USB 3.0 Super-speed drive. The adapter supports 2.5" and 3.5" SATA hard drives and SATA CD/DVD drives.

### Features & Specification

- SATA III with transfer rate up to 6Gbps (for some models)
- SATA II with transfer rate up to 3Gbps and SATA I with transfer rate up to 1.5Gbps
- Complies with Universal Serial Bus 3.0 Specification, Revision 1.0
- Complies with Universal Serial Bus Specification Revision 2.0
- Complies with USB Storage Bulk only Specification 1.0
- Supports data transfer rates: USB3.0 Super-Speed (5 Gbps), USB 2.0 High-Speed (480Mbps) and Full-Speed (12Mbps)
- Connectors: One eSATA 7-pin, One USB 3.0 Type A
- True Plug & Play and hot plug, no drivers needed for Windows
- LED indicators: Red=Power On, USB2.0 Activity, Data Transfer Activity; Green=USB3.0 Connection

### System requirement

- Desktop or notebook PC with a USB 3.0 port
- Power supply for your SATA/eSATA device
- Supported Operation System: MS Windows 7 / Vista / XP / Server 2003-2008 / 2000

### Installation

1. Prepare a eSATA-to-eSATA or eSATA-to-SATA cable for your SATA device.
2. Connect the SATA device to one end of the SATA cable. Connect the other end of the SATA cable to the eSATA connector of this product.
3. Connect the power supply to the SATA device and then turn the power on.
4. Switch on your computer. The operating system should detect this new device and automatically install the appropriate driver.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
