Re: FCC ID: U4A-YRHCPZW0

To Whom It May Concern:

The following application is submitted on behalf of our client, Assa Abloy Inc., for evaluation of their models YRD220-ZW, YRD210-ZW, YRT210-ZW and YRT220-ZW for a Class II Permissive Change under FCC Part 15.249. The purpose of this Class II permissive change is to add four electrically identical model variants.

The Yale Real Living is a battery-powered electronic deadbolt/lever lock that contains RF circuitry that allows lock operation via RF signals from an automation system controller based on a Zwave module operating at 908.4 MHz.

Including the original certified model YRDZW, all five models are electrically identical with respect to the RF circuitry and differ only in user interface (pushbutton / touchscreen interface) and mechanical functionality (deadbolt / lever operation). The YRD210-ZW, YRT210-ZW and YRT220-ZW models were tested for radiated emissions per the aforementioned rules and were found to be in compliance. Model YRD220-ZW is identical to model YRDZW included in the original certification, therefore evaluation for that model was not required.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive, flowing style.
