Re: Class II permissive change request

Bologna, October 12th, 2010

Dear Sir / Madam,

This communication is for a request of a CLASS II Permissive Change regarding to FCC ID U4F0019. This is in order to add the new model numbers of products that contain the radio module Small Size Star Module L.C. 910MHz.

The new model numbers are:

GM4100-HC-910 reader (equivalent models previously certified GM4100-BK-910, GM4100-WH-910)
GM4100-HC-D910 reader (equivalent models previously certified GM4100-BK-D910, GM4100-WH-D910)
BC4010-HC-910 base station (equivalent models previously certified BC4010-BK-910, BC4010-WH-910)
BC4030-HC-910 base station (equivalent models previously certified BC4030-BK-910, BC4030-WH-910)

The new models are identical to the respective models previously certified except for the plastic case material (they have the same electronic boards).

The new case material is a different plastic with the addition of Health Care additives in order to have a product with high cleanable properties. This new plastic doesn't affect radio emissions. With this plastic we have only one colour instead to the two colours used with the previously certified models before.

Kind regards,
R. Cacioppo
