

Modular Approval Request FCC (KDB 996369 D01 & Part 15.212)

This modular transceiver is approved for use by the Grantee in its own products and not intended for sale.

FCC ID: U4FBT-MRY-A1

<i>Items to be covered by Single modular transmitters.</i>	<i>Answer from applicant</i>
1. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	YES, see picture below 
The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	The radio module has buffered modulation/data inputs to ensure that the module complies with Part 15 requirements under conditions of excessive data rates or over-modulation
2. The module must contain power supply regulation on the module	YES, the module contains power supply regulator
4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	Permanently attached antenna
5. The module must demonstrate compliance in a stand-alone configuration.	YES, the module has been tested using a test board to supply the module and send test commands
6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).	YES, see picture below 
7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.	YES, module has been tested according to FCC 15.247 regulation
8. The module must comply with RF exposure requirements.	Module complies with the requirements of RF Exposure portable devices
