Client Declaration Letter

Date: Jan. 26, 2023　　　　　　FCC ID: U4GDL36WF

We have declared below featured for device identified as

(1) DFS Device — ☐ Master,　　　　　　　　　　☐ Client with Radar detection capability ,
　　　　　　　　　　☒ Client without radar detection capability,　　　☐ N/A

(2) Active / Passive Scanning , ad hoc mode access point capability

Frequency	Active Scanning [The device can transmit a probe (Beacon)]	Ad Hoc Mode [Where the device is can listen only with no probes]	Ad Hoc Mode or WIFI Direct Capability	Access Point Capability
5180 - 5240	No	Yes	No	No
5260 - 5320	No	Yes	No	No
5500 - 5720	No	Yes	No	No
5745 - 5825	No	Yes	No	No

(3) Country code selection capability to end user- ☐ Yes ， ☒ No
　　 If yes, pls explain how it was implemented: (pls also help to provide detail of options for each
　　 country selection)

(4) Meet Part 15.202 requirement - ☒ Yes , ☐ No ,
　　 * A client device is defined as a device operating in a mode in which the transmissions of the
　　 device are under control of the master. A device in client mode is not able to initiate a network.

(5) For client devices that have software configuration control to operate in different modes (active scanning in
　　 some and passive scanning in others) in different bands (devices with multiple equipment classes or those
　　 that operate on non-DFS frequencies) or modular devices which configure the modes of operations through
　　 software, the application must provide software and operations description on how the software and / or
　　 hardware is implemented to ensure that proper operations modes can't be modified by end user or an
　　 installer.

　　 ☐ Apply   ☒ No Apply
　　 (If apply, pls help to provide explanation on it was implement, and how software was controlled).
