

SKORPIO X5

FCC declaration of similarities among the variants

Model: SKORPIO X5

FCC ID: U4GSX5WB

Manufacturer: Datalogic SRL, located in Via S. Vitalino, 13 – 40012 Lippo di Calderara di Reno (BO) – Italy,

TO WHOM IT MAY CONCERN

SKORPIO X5 (rugged mobile computer with 1D/2D barcode reader) covers possible variants, also based on different *form factor* and *dock connection* features:

Variant	Difference
Hand Held + WiRed	related to the variant with hand-held form factor and contact pad connections for battery charge via cradle
Gun + WiRed	related to the variant with pistol grip form factor and contact pad connections for battery charge via cradle
Hand Held + WLC	related to the variant with hand-held form factor and wireless charging for battery charge via cradle
Gun + WLC	related to the variant with pistol grip form factor and wireless charging for battery charge via cradle

Except for form factor and dock connection, the variants listed above are identical in circuitry and electrical, mechanical and physical construction.

The four device typologies above are equipped by the same PC Board, the same components, the same physical layout, the same Operating System.

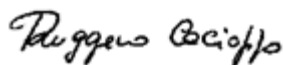

The relevant differences among the four device typologies are the gun handle removal (that is just an add-on completely made of plastic, without any electrical part and without any electrical contact) and wireless charge receiver components not mounting.

We wish a unique FCC ID (U4GSX5WB) for all the SKORPIO X5 variants will be allowed.

Lippo di Calderara di Reno,
