

April 7, 2008

Dear Application Examiner:

This application is for the Class II Permissive Change (C2PC) authorization of Datalogic Mobile's portable data terminal FCC ID: U4SPD. It contains GSM, WLAN, and Bluetooth radios. The purpose of this C2PC is to get the simultaneous transmit condition changed. In the original filing, the operational description said:

"Note:

1. The Bluetooth and WLAN functions can transmitted simultaneously
2. GSM and WLAN functions can't be transmitted simultaneously"

[https://gullfoss2.fcc.gov/prod/oet/forms/blobs/retrieve.cgi?attachment\\_id=894788&nativ  
e\\_or\\_pdf=pdf](https://gullfoss2.fcc.gov/prod/oet/forms/blobs/retrieve.cgi?attachment_id=894788&native_or_pdf=pdf)

Now, the grantee wants the GSM, WLAN, and Bluetooth radios to transmit simultaneously. So a SAR evaluation was performed with the radios transmitting simultaneously. A technical report has been submitted to support this new RF exposure condition.

No changes have been made to the radios or their antennas.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

A handwritten signature in black ink, appearing to read "Wes Emmert".
