RE: 8310A-RE259 New Family

To Whom It May Concern:

There will be 4 models listed under IC: 8310A-RE259. These models are RE259, WFX-360HW, RE259T, and WFX-3602G. The RE259 model is identical to the WFX-360HW model in every respect and uses Firmware Version Identification Number 75-0092-02. The RE259T model is identical to the WFX-3602G model in every respect and uses Firmware Version Identification Number 75-0092-04. The RE259/WFX-360HW models (FVIN 75-0092-02) and RE259T/WFX-3602G models (FVIN 75-0092-04) are also identical to each other in every respect except that the firmware for each group sends a slightly different RF transmission format. The different RF transmission format allows communication to two different types of security systems.

Sincerely,

Paul Saldin
Vice President
