

H3C

Here we declare that:

The H3C WA2110 product meet the discontinue transmission requirement of FCC part 15 by the following two specialties:

1. First the AP will stop transmit frame to specify STA when STA is deassociation normally or auto check confirm that STA has disconnected at the AP.
2. The second one is the Tx-limit feature of the AP will stop all transmission when current transmission exceed the maximum limit time per the 802.11 specification.
