To Whom It May Concern:

This letter is to request Limited Modular Approval in accordance with FCC Rule Part 15.212(b) for the certification request under FCC ID: **U6Y-M12011**. This product is an **802.11 module** and can be used in **Panasonic Inflight Entertainment IPSC series tablets, WSCU controllers, and their docking cradles.**

Declaration of conditions.

Y/N	15.212(a)(1) Condition
YES	(i) The radio elements of the module have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements
YES	(ii) The module has buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.
YES	(iii) The module has its own power supply regulation.
YES	(iv) The module complies with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204(c). The antenna(s) are either permanently attached or employ a “unique” antenna coupler (at all connections between the module and the antenna, including the cable).
NO	(v) The module was tested in a stand-alone configuration, i.e., the module was not inside another device during testing for compliance with part 15 requirements. Unless the transmitter module will be battery powered, it complies with the AC line conducted requirements found in §15.207. AC or DC power lines and data input/output lines connected to the module do not contain ferrites, unless they will be marketed with the module (see §15.27(a)). The length of these lines was the length typical of actual use or, if that length is unknown, at least 10 centimeters was used to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing were unmodified and commercially available (see §15.31(i)).
YES	(vi) The module is equipped with either a permanently affixed label or is capable of electronically displaying its FCC identification number.
YES	(vii) The module complies with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the applicant has provided adequate instructions along with the module to explain any such requirements.
YES Note 1	(viii) The module complies with any applicable RF exposure requirements in its final configuration. The instructions provided with the module adequately explain any usage conditions or restrictions.

Panasonic

Panasonic Avionics Corporation

Explanation of limitations for items not compliant with the above conditions.

Section	Detailed Explanations (if needed)
viii	Note 1: Portable application which are different from this filing will be authorized by C2PC.

List of additional restrictions or conditions of use for this module (optional).

Only operating on the 5 GHz band on non-DFS channels 36, 40, 44, & 48.

Methods used to address restrictions to ensure compliance for all finished products (optional).

Operation in the above mentioned channels is controlled by software not acceptable to the end user.

I acknowledge on behalf of the applicant that compliance of this module in all final configurations is the responsibility of the applicant under the condition that the integrator follows all provided installation instructions.

Sincerely,

Loi Ninh
