## Panasonic Avionics Corporation

5/23/2019

Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

Panasonic Avionics Corp. hereby requests a Permissive Change Class II of the radio equipment certification for the IPSC v1.5 certification number, FCC ID: U6Y-M12011. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – No changes to the output power, however the microprocessor and LCD screen was replaced due to obsolescence resulting in a new  $\mu$ P board layout. Digital control for the radio has remained the same. Tablet chassis is still using the same chassis, and docking cradle.
- (b) Functional capabilities. – No changes to the functionality.
- (c) Antenna Characteristics. – No changes to the antennas.
- (d) Cosmetic differences – Plastic enclosure has an updated look otherwise no changes.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Loi Ninh  
Principal Engineer Sr., EMC Group
