Columbia, MD 21046

To whom it may concern:

Panasonic Avionics Corp., hereby requests a Permissive Change Class II of the radio equipment certification for the Smart Monitor (P/N: R8U4FJ5164Z), certification number, FCC ID: U6YBT850. This product differs from the originally approved product in the following manner:

- (a) Associated digital circuitry – No change.
- (b) Digital control for the radio has remained the same.
- (c) Functional capabilities – No changes to the functionality.
- (d) Antenna Characteristics – Microstrip Antenna Dipole antenna type (same as approved type), gain increased to +1.5dBi.
- (e) Power output setting remained the same at +2 dBm.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Hirokazu Masuda
Director, Global Quality
