Attn: Equipment Authorization Branch

Ref: Class II Permissive Change for FCC ID: U72DRX1

The purpose of this letter is to request a Class II Permissive change for FCC ID: U72DRX1. The changes made to this application are as follows:

1. The radio band has been expanded from the current range of frequencies of 5180 – 5230 MHz with output power of 0.0323 watts to include 5260 – 5320 MHz at an output power of 0.0389.
2. The Transmitter remains identical as described in all documentation for the initial certification of U72DRX1
3. No changes were made in the transmitter section nor the antennae, the firmware allowed the radio to operate on the additional channels using the same modulation and power output.

Respectfully Submitted,

Ronald L Cain
