LED Information
Inserting and Removing USIM CARD

Specification and Characteristics

Classification		Information
Product Name		M3 Orange
System	CPU	MARVELL PXA-320 806Mhz
	OS	Windows Mobile 6.5
	ROM	NAND 128 / 256MB / 1G
	RAM	256MB
	Display	240 x 320, 3.5", Color TFT LCD(260,000Color) Backlight LED Type
Commnication Function	WWAN	The Americas - EGSM-850 / GSM-1900 Europe - EGSM-900 / GSM-1800 / WCDMA2100
	Bluetooth	Bluetooth 2.0 EDR
	Wi-Fi	802.11 a / b / g
General Function	Barcode Scanner	1D Laser or 2D Imager
	GPS	Integrated GPS

Specification and Characteristics

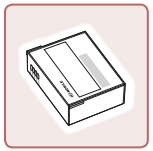
Classification		Information
Etc.	Expanstion Slot	Micro SD Card
	Keypad	Numeric 3 x 4 Dial, Direction, Function (front, 4side), 1 Power
	Input Method	Touch Screen
	PEN	Stylus Pen
	I / O	USB Host, USB Client, External Serial Port, Micro-phone, Speaker, Receiver, Stereo Ear-mic jack
	Operating Temperature (Main Unit / Adapter)	-10 ℃ ~ + 50 C
	Adapter Power	Input : AC 220V Output : DC 5.2V / 5A
	Battery	Lithium Ion 3,300mA/h
	IP	IP54(DUST & WATER PROOF)
	Impact	1.5m drop

Product Configuration

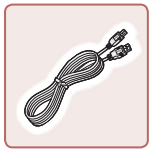
- Check if all following items are included when you open the box for the first time.

M3-Orange Main Unit

Craddle



Two Standard Batteries



USB Cable

Portable Adapter

Earphone

Stylus Pens

Manual CD

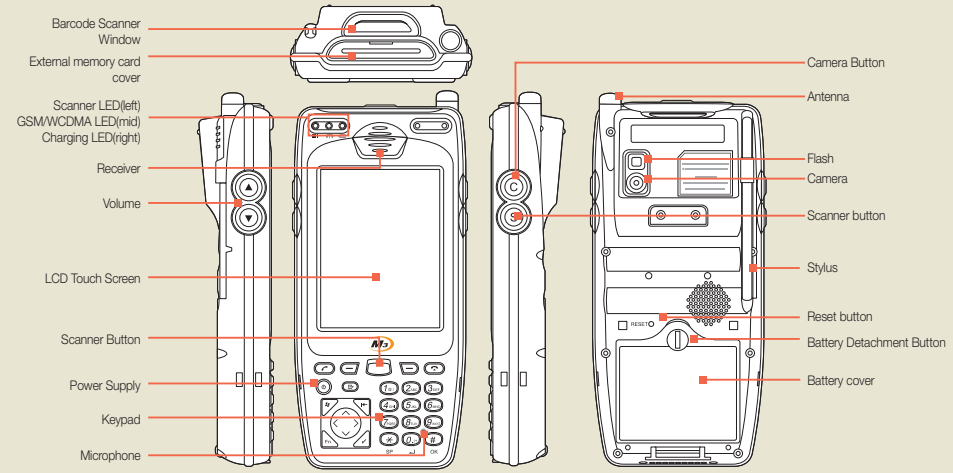
Manual

Keep this in mind

- Not all items above may be included according to the shipment option.

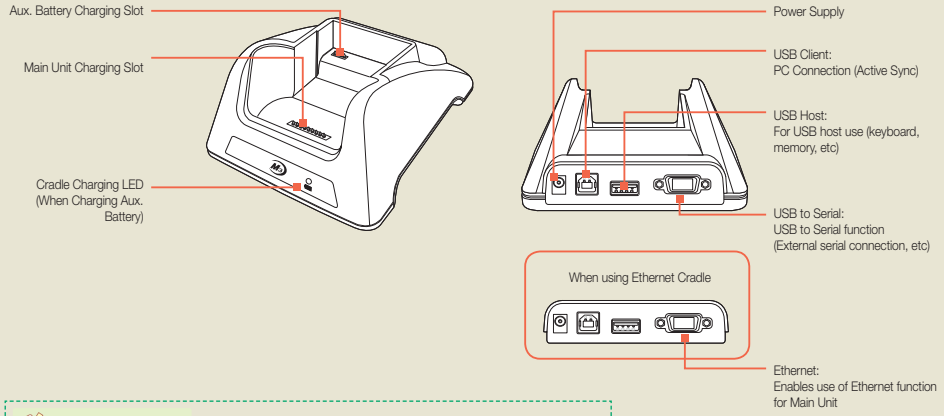
Name and Function of Each Part

M3-Orange Main Unit



Name and Function of Each Part

Cradle



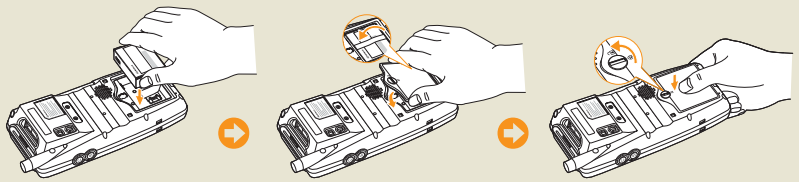
Keep this in mind

- USB Host and USB Ethernet are optional functions.
- Optional functions or items that were not purchased cannot be used.

Inserting and Removing the Battery

Inserting Battery

- Insert the battery to the battery pack position, and then cover the ribbon. After putting the battery cover, tighten a screw in a counterclockwise direction.



Removing Battery

  - Block/Letter Recognizer : In the input mode screen, you can enter the text in 'abc' section, and enter the number in '123' section on the screen.
  - Transcriber : When you enter the letter, number, symbol with stylus, this program automatically writes where the cursor is positioned. You don't have to care about the input section.

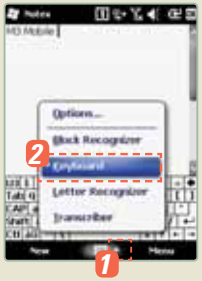
Block Recognizer

Transcriber

Letter Recognizer

Keyboard

- The keyboard input is the way of entering the text using the stylus pen by touching the virtual keyboard which is the same shape as the actual keyboard on the screen.
- You choose the input method by clicking icon at the bottom of screen.
- You can enter the text by touching the keyboard directly.



Screen for selecting Keyboard

Small Keybard

Big Keyboard

Options

ActiveSync

ActiveSync Introduction

- Sync is an abbreviation of Synchronization. In our case, it means to sync data between the PDA and PC by connecting them so that the data on both devices is the same.
  - When the data is modified in either the PDA or PC, the Sync function conveniently updates the data on the other device with the latest data between two of them.
  - Not all data is synchronized, and it depends on the option setting for Microsoft's ActiveSync.
- You can connect the PDA and computer to synchronize the data between them, or install work programs, copy, move, or delete the files.
- The ActiveSync program must be installed for work program installation, data synchronization, and backup and synchronization of contacts such as your phonebook.

Warning!

- Never connect the USB of the cradle to the USB port of the PC before installing the ActiveSync program. As Microsoft's PDA device driver software is included in the ActiveSync, connecting before installing may cause problems since the PDA device may not be recognized by your PC.

ActiveSync

To install ActiveSync

- Insert the CD included with this product, and select ActiveSync from the Auto-run screen to install the program.
- Select the Next button, and select the Cancel button when you see the [Your device was not detected] screen.
- Connect the USB cable between the cradle and USB port of your PC, and place the PDA on the cradle while the LCD power is on.
- When you see the [New hardware detection wizard] screen, double click the Next button to automatically install the driver, and then select the Finish button.
- When you see the [Set Up a Partnership] screen, make the Partnership, and then continue by selecting the [Next] button.
- Select the Finish button from the [Setup Complete] screen to complete the installation.
- The [Microsoft ActiveSync] window will pop up, and the programs selected while setting up the partnership will begin synchronization.

About Partnership

- Partnership is a procedure for mutual certification so that PC and PDA can exchange the data.

※ The device cannot be synchronized with Outlook Express that comes with Windows, and Microsoft Outlook or later versions of the program must be installed on the PC.

Warning!

- Strong external noise from static electricity around the system may disturb the connection. In this case, retry the synchronization.

ActiveSync

Synchronizing Data

- There is an Option icon if you see the Microsoft ActiveSync window option," "Sync mode," "Sync mode"and"Rules" tabs will appear.
- "Sync option" is the menu for selecting the items to synchronize.
  - Contact, schedule, work, files, and channel can be selected.
- "Sync mode" is for selecting the method of synchronization, and you can use one of the three following methods depending on the selected Sync mode.
  - Continue while the device is connected: ActiveSync starts the synchronization, and whenever modified items will be synchronized when are entered in the PC or PDA.
  - Only when connected: After the first synchronization is completed, click the Sync button in order to manually execute the synchronization.
  - Manually: ActiveSync does not work automatically. Click the Sync button to synchronize the data in this mode.
- The synchronization process compares the data on the PC and PDA, and updates the data on both sides with the latest data. Personal schedule manager data or files can also be synchronized with the corresponding files on the PC.

When ActiveSync does not work

- Check whether the USB cable is properly connected to the cradle and the PC's USB port.
- Check whether the power of the M3 and LCD is on.
- Select File > Connection Setting from the ActiveSync program, and then open the window.
  - Check whether the [Allow USB connection with this desktop computer] item is checked.
  - If not checked, then check the option and try Sync again.
- Conduct a soft or hard reset, and then try Sync again. The currently running software must be terminated and data must be saved before the reset.
  - Double click the Device Manger button in the [Hardware] tab from Start > Setting > Control Panel > System menu of PC.
  - Check whether there is a yellow exclamation mark on any of the items below [General Purpose Serial Bus Controller] in the [Windows CE USB Device] folder.

If there are any yellow exclamation marks shown on the icons.

1. Select Microsoft USB Sync in Windows CE USB Devices folder.
2. Select the Driver Update button in [Driver] tab.
3. When the [Device driver update wizard] window appears, press the Next button, select 'Search Appropriate Driver', and then click the [Next] button.
4. Check the Microsoft Windows Update and click the Next button.
5. The latest USB driver will be automatically downloaded from MS over the internet.
6. Reboot the PC and run ActiveSync again.

Inserting the Memory card

Inserting and Removing Micro SD Card

Inserting Micro SD Card

- Open the memory card cover on the top of the main unit.
- After inserting Micro SD Card as shown in the picture, cover it.

Micro SD Card Usage

- Once inserting Micro SD Card, [Storage Card] icon appears in [Start] ▶ [File Explorer] ▶ [Show] as below.
- Click [Storage Card] icon and check the contents in Micro SD Card. (Refer to the progress below.)

  - No service on holidays.

Inquiries about the program / Requisition A/S via Web-site

- You can access Korean internet domain M3 Mobile.
- Korean domain: Website: http://www.m3mobile.co.kr

Part 15.21 statement
" Change or Modifications that are not expressly approved by the manufacturer could void the user's authority to operate the equipment. “

Part 15.105 statement
This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules.
These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Part 15 Class B Compliance
This device and its accessories comply with part15 of FCC rules.
Operation is subject to the following two conditions:
(1) This device & its accessories may not cause harmful interference.
(2) This device & its accessories must accept any interference received, including interference that may cause undesired operation.

"This device is indoor user only"

This device operate normally with frequency stability under all condition.
