Declaration concerning separate US product version

Dear Sirs,

for the product Mobile Panel 277(F) IWLAN (FCC ID: U9A277IWLAN-V100) there will be product versions for the US market. This US product versions will have separate ordering numbers (Siemens MLFBs). The US product versions are identical in construction (hardware, mechanics, etc.) to the product versions for the rest of world. There will be only one minor change in the device firmware. In contrast to the product versions for the rest of world the US product versions will not allow open country user settings. For the US product versions the country code will be fixed to US and cannot be changed by the user. In this way it is guaranteed that the US product versions only operate on permissible Part 15 frequency bands. Furthermore this assures that the US product versions will not operate on WLAN channels 12 and 13 and therefore the tight band edge measurements at 2483.5 MHz are met.

Sincerely yours,

Siemens Aktiengesellschaft

Martin Ober
