Re: FCC ID: U9O-RF300

To Whom It May Concern:

The following application is submitted on behalf of our client, Synapse Wireless, Inc., for evaluation of their model RF300 for certification under FCC Part 15.247.

The RF300 is a low power, frequency hopping modular transmitter in the ISM 915MHz frequency band. The module is intended to be used by OEM and Integrators in order to add RF wireless communication to their products.

The module is plugged in to a host board which provides the OEM with the ability to wirelessly communicate between their different host board products. The RF300 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
