

CONFIDENTIALITY REQUEST

Federal Communications Commission  
Equipment Authorization Branch  
7435 Oakland Mills Road  
Columbia, MD 21046

Date: 5/1/2007

Gentlemen:

Wireless Control Network Solutions, LLC.; d/b/a Synapse, respectfully requests confidentiality of certain materials provided with the submission of the RF Engine under FCC ID: U9O-RFET in accordance with FCC Regulations 0.459. The confidentiality request applies to the schematics, parts lists, internal photos, block diagrams, and detailed operational description contained in this filing and included in the following files.

- 07-0157 – Schematics – RFET.pdf
- 07-0157 – System Block Diagram – RFET.pdf
- 07-0157 – Internal Photos – RFET.pdf
- 07-0157 – Parts List – RFET.pdf
- 07-0157 – Theory of Operation - RFET.pdf

The RF Engines ship with the RF shield attached which covers the electronic component side of the module. These shields are soldered to the PCB and are not removable without damaging or destroying the electronics. Since the shield does not allow customers or competitors to be able to see our board component layout as well as our component vendors, we prefer to keep it that way so we respectfully request that the internal photos be held in confidentiality.

The RF Engine has been developed at considerable effort and expense by Synapse. These items are considered as Trade Secrets and therefore public access to the proprietary material could possible result in duplication of equipment that could severely damage the company's business advantage.

I appreciate your assistance in this matter.

Sincerely,

Name: Gary W. Shelton

Signature:

Title: President
