Re: FCC ID: U9O-SM200

To Whom It May Concern:

The following application is submitted on behalf of our client, Synapse Wireless Inc., for evaluation of their model SM200 for certification under FCC Part 15.249.

The Synapse Wireless SM200 module is an IEEE 802.15.4 compliant RF module. The frequencies of RF transmission are in the ISM 2.4GHz band with 16 total channels of operation in this band. These RF modules are intended to be used by OEM and Integrators in order to add RF wireless communication to their products.

The SM200 was tested with a test evaluation board to supply power and program the EUT for test modes. The SM200 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large initial 'R'.
