Subject: Request for Approval of Class II Permissive Change.

Reference: FCC ID: U9YAL5721

To Whom It May Concern:

Alereon, Inc. hereby requests FCC approval of a Class II Permissive Change to the Single Modular UWB Transmitter, Alereon Model AL5721 UWB Module, FCC ID U9YAL5721. The Alereon AL5721 was originally granted FCC Certification approval on 03/13/2009. This letter describes the nature of the changes made to the originally authorized configuration.

No changes are made to the design or constructions of the previously authorized device. The purpose of this change request is to add an antenna type to the list of antennas approved for use with the FCC ID U9YAL5721.

The following changes are made to the antenna configuration.

1. The Hanshin BT_UWB_Omni antenna is added to the list of antennas used with the AL5721.

A report of testing to the limits of FCC part 15.519 is included with this filing to demonstrate that the unit continues to comply with the FCC limits with the new antenna type.

Respectfully,

David Dickson
Senior Principal RF Engineer
Alereon, Inc.
