Equipment: RF-module for Nokia Flexi WCDMA BTS 1.7/2.1
FCC ID: UAFFRIB-01
Subject: FCC Rule Parts 27 Class II Permissive Change

Dear Sir/Madam,

Nokia Corporation/Networks/Radio Networks applies class II Permissive Change for the alternative second carrier functionality of the FRIB RF-module.

No changes have been made to module hardware or original documentation. The told update is fully made by software modification.

The extensive testing performed shows that even with the above mentioned software modification the compliance with the requirement of FCC part 27 is still fulfilled.

The original Request for Confidentiality of FRIB under CFR 0.457 and 0.459, dated 20.6.2006 and signed by Juha Ala-Mursula (General Manager, WCDMA BTS R&D), is valid for the Permissive Change under consideration.

Very Best Regards,

Jari Virta,
R&D Manager,
WCDMA BTS Product Conformity
