SAR Report RFI-SAR3-RP78769JD09A

Additional explanation of EUT test orientations and SAR scans

The DASY 4 system details are in SAR Report Part 3 Appendix 7 (Page 56-58).

The "Touch Right" EUT position considerations are explained in SAR Report Part 1 Page 10, referring to procedures from your KDB 648474 D01 (KDB Section 5). ie:

Some point in the "Touch Right" position could not be fully evaluated, therefore the zoom scan was unable to fully enclose the peak SAR location as required by IEEE 1528 and OET Bulletin 65 Supplement C. This was overcome by the scan being repeated in the Mouth / Jaw configuration on the flat section as per KDB 648474 D01.

Relevant SAR Scans and results are shown in SAR Report Part 1, Appendix 3 (Page 26) contained in "RF Exposure Info" exhibit folder of this filing.

All required SAR test orientations are shown in "SAR Report Part 2 Test Set Up" confidential exhibit contained in the "Test Set Up Photos" exhibit folder of this filing. (Ref. SAR Report Part 2 Appendix 4).
