

Re: FCC ID UCE210029A

SAR Report RFI-SAR2-RP777281JD01A

Additional explanation of EUT test orientations and SAR scans

All required SAR test orientations are shown in “SAR Report Part 2 Test Set Up” confidential exhibit contained in the “Test Set Up Photos” exhibit folder of this filing. (Ref. SAR Report Part 2 Appendix 4).

SAR results for all orientations are detailed in SAR Report Part 1 contained in “RF Exposure Info” exhibit folder of this filing.

The SAR Distribution Scans are detailed in SAR Report Part1 Appendix 3.

The DASY system generates the scans and provides a full cube for only the highest SAR point identified for each scan. Other hot spot zoom scans shown on the area scan are not measured by the DASY system as they are not within 2dB of the highest SAR level. This is standard characteristic of the DASY system. (Ref. SAR Report Part 1 Scan Pages 31-34).
